mesolifting

Instructions for use SCHALI® Anti-Wrinkle cosmetic hydrogel in professional comprehensive procedure of non-invasive mesolifting

TRADE NAME:

SCHALI® Anti-Wrinkle.

PRODUCT FORM:

Cosmetic hydrogel in 15 ml polyethylene tubes.

INGREDIENTS:

Aqua, Glycerin, Glycereth-18 Ethylhexanoate, Glycereth-18, Acrylates/C10-30 Alkyl Acrylate Crosspolymer, Titanium Dioxide, Triethanolamine, Propylene Glycol, Diazolidinyl Urea, Methylparaben, Propylparaben, Phosphoric Acid.

CHARACTERISTICS OF THE PRODUCT:

The photoactive composition of the SCHALI® Anti-Wrinkle hydrogel based on the photosensitizing effect of a special class QD SCHALI® provides a highly efficient catalysis of active oxygen forms (singlet oxygen).

Active forms of oxygen promote oxygenation and improve blood supply and metabolic processes in tissues, as well as restore disturbed energy metabolism in tissues.

Due to the restoration of energy metabolism in cells, metabolic processes, microcirculation are stimulated, oxygen saturation of tissues occurs.

The SCHALI® Anti-Wrinkle hydrogel is used both with prophylactic action and in photodynamic therapy (PDT).

Photosensitive crystals of QD SCHALI® initiate intensive release of active oxygen form under the influence of light of a wide range of radiation (from ultraviolet to infrared). Photoactive products based on QD SCHALI® are designed for universal use and can also be used in photodynamic therapy (PDT) with various sources of monochromatic radiation (laser light of certain ranges).

COMPREHENSIVE PDT TECHNIQUE:

It is recommended that before the application of the SCHALI® Anti-Wrinkle cosmetic hydrogel on the surface of the face, the procedure of Microdermabrasion (at the discretion of the cosmetologist and depending on the condition of the facial skin surface) is carried out, this procedure or its analogues are widely known to practising cosmetologists. After preparation of the facial skin, apply the SCHALI® Anti-Wrinkle hydrogel and allow the absorb within 10 minutes. For the second time, the SCHALI® Anti-Wrinkle hydrogel is applied 5 minutes before the common electroporation procedure (time and intervals between microdermabrasion and electroporation procedures are prescribed by a practising cosmetologist, guided by his/her own experience). Electroporation is non-invasive alternative, that is not accompanied by a needle mesotherapy, a completely painless and harmless procedure.

SCHALI® Anti-Wrinkle hydrogel favourably differs by its penetration and targeted ability of action.

Synergism of the effectiveness of non-invasive mesolifting is achieved due to laser phototherapy, using an infrared (IR) range of action with a power of 3 to 10 J/cm².

Due to non-invasive laser mesotherapy, the results of the effectiveness of skin aging elimination

are much higher (compared to mesotherapy with the use of all known in the world "cocktail" sets for mesotherapy), and is also effective for the following indications:

- non-invasive lipolysis and elimination (prevention) of cellulite;
- rehabilitation, in some cases, the replacement of plastic surgery;
- treatment of acne;
- prevention and treatment of oily and porous skin;
- fighting fat deposits;
- treatment of hair;
- cosmetic effect in the treatment of scars;
- lifting and whitening of complexion, neck, décolleté and other areas;
- natural effect of preventing the appearance and elimination of wrinkles (botox analogue);
- prevention of appearance and elimination of wrinkles;
- slowing skin aging and long-term regeneration effect of cells and skin;
- improvement of general condition, vessels, etc.

SIDE EFFECTS:

No side effects found.

No product dependence and no rebound syndrome.

CONTRAINDICATIONS:

Do not use during pregnancy.

In other cases, no contraindications have been identified.

STORAGE CONDITIONS:

Keep the product in a dark cool place at the temperature below 15°C.

SHELF LIFE:

Shelf life is 3 years from the date of production.

Do not use the product after expiration of the date of production, specified on the package.

Complex products of the **SCHALI® Care** series are made under license No. 286-S
