Male Liquid Rectal Suppositories
SCHALI® Care–MF
Prostate Malfunction

SCHALI® Care–MF Liquid Rectal Suppositories are a highly-effective photoactive product intended to promote prostate health in scope of complex treatment and prevention of age-related prostate malfunction and functional sexual disorders.

PRODUCT FORM:

Prophylactic hydrogel in 3 ml disposable single-dose container.

INGREDIENTS:

Aqua, Hydroxypropyl Cyclodextrin, Glycerin, Propylene Glycol, Glycereth-18 Ethylhexanoate, Glycereth-18, Acrylates/C10-30 Alkyl Acrylate Crosspolymer, Titanium Dioxide, Triethanolamine, Diazolidinyl Urea, Methylparaben, Propylparaben, Phosphoric Acid.

MECHANISM OF ACTION:

Soft hydrogel formulation of the suppositories dissolves slowly in the rectum, where it is absorbed by rectal mucosa. The product acts locally by inducing regeneration, strengthening vascular walls and improving microcirculation in capillaries.

Mineral bio-constituent of the hydrogel formulation includes fragments of a certain class of metalloid semiconductors with unsaturated bonds - titanium dioxide crystalline lattice - known for its high catalytic activity. Photoactive particles of QD SCHALI® titanium dioxide trigger generation of active oxygen forms (singlet oxygen). Mechanism of action is based on the principle of energetic neutralization of free chemical bonds on the surface of toxic compounds by saturating them with complementary oxygen atoms, generated in the result of the catalytic reaction.

Besides, active oxygen forms (singlet oxygen) trigger mechanism of activation in serotonin receptors, leading to better regulation of serotonin reuptake inhibition by selectively blocking serotonin absorption in presynaptic membrane. Re-balanced serotonin level helps in restoring homeostasis and ceasing thanatogenesis, promotes male health and sexual desire, and improves both cellular metabolism and condition of blood vessels. The product cytostatically affects hyperplastic tissues, resulting in a quick and effective relief of symptoms of non-inflammatory conditions of prostate diseases. Relaxation of prostatic smooth muscles may reduce pressure in prostatic tissues that contributes to better blood flow and helps in relieving pain and lowering muscle contractility.

Regular use of the product supports circulatory system function, promotes production of endothelium-derived relaxing factor, widens small arteries, increases venous tone, lowers penetrability in vascular walls, reduces oedema, and stabilizes platelet and erythrocyte membranes.

The product is intended for personal care purposes, has preventive action and may be used as complex therapy and photodynamic therapy agents in treatment of a wide range of urological conditions for anti-aggregate effect.

Hypoallergenic product.

INDICATIONS:

- Prostatic hyperplasia, stages I and II
- Chronic pelvic pain syndrome
- Peyronie's Disease

- Varicocele
- Hydrocele testis
- Epididymal cyst
- Testicular cyst

METHOD OF USE:

For rectal use only.

Take one single-dose container out of the package with clean hands, insert into the rectum and press out its content, while lying on your side. Apply one suppository 2 times a day for one month. Extend your course of treatment up to 90 days, if necessary.

SIDE EFFECTS:

No side effects found.

No product dependence and no rebound syndrome.

CONTRAINDICATIONS:

No contraindications detected.

STORAGE CONDITIONS:

Keep the product in a dark cool place at the temperature below 25°C.

SHELF LIFE:

Shelf life is 3 years from the date of production.

Do not use the product after expiration of the date of production, specified on the package.
