

Instructions for Use

SCHALI®-D3 Encapsulated Dietary Bio-Complex

Promoting pancreatic function

Instructions for Use SCHALI®-D3 Encapsulated Dietary Bio-Complex Promoting pancreatic function

PRODUCT FORM:

Powder of dietary supplement, ready for consumption.

INDICATION:

Aid in relieving inflammation in pancreas, improving carbohydrate metabolism and immobilization of dietary fats in gastrointestinal tract.

SCHALI®-D3 Encapsulated Dietary Bio-Complex promotes pancreatic function, induces pancreas to restore tissues and to remove ferments and toxins, and may be used both alone for prevention of pancreatic disorders as well as in complex treatment of broken metabolism and endocrine disorders conditions.

SCHALI®-D3 Encapsulated Dietary Bio-Complex is recommended also to healthy humans, who practice an active lifestyle, for better vital energy and metabolic rate, and protection of human body from everyday stress and harmful environmental impact.

INGREDIENTS (active):

- Cyclomalto-octose or Gamma-cyclodextrin (γ CD);
- Cyclomalto-hexaose or Alpha-cyclodextrin (α CD);
- Resveratrol.

MECHANISM OF ACTION:

Active cyclodextrin ingredients are easily split by human amylases into linear malto-oligosaccharides and act as inhibitors of glycogen phosphorylases, too, resist to any human amylolytic degradation, have a potent effect on immobilizing dietary fats, fatty acids, triglycerides etc., restore maintenance of normal blood glucose, contributing to general antidiabetic effect. Active natural plant-originated phytoalexin ingredient of resveratrol, encapsulated into cyclodextrin cavity, exerts hypoglycaemic and hypolipidemic effects. Resveratrol supports both pancreatic exocrine function, i.e. production of ferments promoting protein, fat and carbohydrate absorption in the gastrointestinal tract, and pancreatic endocrine function, i.e. production of hormones (insulin, glucagon etc.), promoting carbohydrate metabolism and controlling blood glucose level, resulting in an effective prevention of signs of diabetes.

SCHALI®-D3 Encapsulated Dietary Bio-Complex contributes to relief from inflammatory processes in pancreas, better metabolism and dietary fat immobilization in gastrointestinal tract, reducing in this way specific pancreatitis symptoms and supporting renal and hepatic functions.

Besides, regular consumption of SCHALI®-D3 Encapsulated Dietary Bio-Complex results in:

- better insulin sensitivity in hepatic cells;
- lower secretion of digestive ferments leading to intoxication;
- better protective functions in duodenum crypt cell production;
- better regulation of motility and secretion in gastrointestinal tract;
- better function of pancreas, liver and kidneys;
- better carbohydrate metabolism;
- lower risk of complications, also of depressive conditions after long-lasting abdominal pains.

CONTRAINDICATIONS:

No contradictions found, as the product ingredients act locally without entering blood stream, it is unlikely to have any interactions with medications. No product dependency. No rebound effect.

However, if you take any pancreatic prescriptions, and you wish to take SCHALI® Encapsulated Dietary Bio-Complexes, too, you have to consult your attending medical doctor for correction of your prescribed medication dose.

METHOD OF USE:

In scope of prevention of pancreatic disorders and for promoting healthy metabolism and pancreatic function, take regularly 1-2 g product once a day within 15 min before meal with a glass of water. Duration of treatment is 30-90 days.

In acute pancreatitis conditions and chronic pancreatitis conditions, take SCHALI®-D3 Encapsulated Dietary Bio-Complex 3 times a day.

SCHALI®-D3 Encapsulated Dietary Bio-Complex may be used in complex treatment of pancreatitis conditions and for supporting pancreatic function in diabetes conditions.

In chronic pancreatitis conditions, it's recommended to take 1-2 g product 1 to 3 times a day within 15 min before meal with a glass of water. Duration of course is 60-90 days. Next to SCHALI®-D3, it's recommended to take additionally SCHALI®-D4 Bio-Complex for the duration of at least 30 days. For better effect, it's recommended to take 2 courses annually.

In complicated chronic and acute pancreatitis conditions, it's recommended to take 1-2 g product 1 to 3 times a day within 15 min before meal with a glass of water. Duration of course is 90-120 days. Additionally, SCHALI®-D4 Bio-Complex may be taken for the duration of 30-60 days. For better effect, it's recommended to take 2 courses annually.

Correction of the prescribed medication dose shall be done by your attending medical doctor only.
