

Instructions for Use
Personal Prophylactic Hygiene Care
Male Liquid Rectal Suppositories
SCHALI® Care–MN
Neurological Conditions

SCHALI® Care–MN Liquid Rectal Suppositories are a highly-effective photoactive product intended for better metabolism and immune defence in scope of complex treatment and prevention of neurological conditions and central nervous system dysfunction.

PRODUCT FORM:

Prophylactic hydrogel in 3 ml disposable single-dose container.

INGREDIENTS:

Aqua, Hydroxypropyl Cyclodextrin, Glycerin, Propylene Glycol, Glycereth-18 Ethylhexanoate, Glycereth-18, Acrylates/C10-30 Alkyl Acrylate Crosspolymer, Titanium Dioxide, Triethanolamine, Diazolidinyl Urea, Methylparaben, Propylparaben, Phosphoric Acid.

MECHANISM OF ACTION:

Soft hydrogel formulation of the suppositories dissolves slowly in the rectum, where it is absorbed by rectal mucosa. The product acts locally by inducing regeneration, strengthening vascular walls and improving microcirculation in capillaries.

Mineral bio-constituent of the hydrogel formulation includes fragments of a certain class of metalloid semiconductors with unsaturated bonds - titanium dioxide crystalline lattice - known for its high catalytic activity. Photoactive particles of QD SCHALI® titanium dioxide trigger generation of active oxygen forms (singlet oxygen). Mechanism of action is based on the principle of energetic neutralization of free chemical bonds on the surface of toxic compounds by saturating them with complementary oxygen atoms, generated in the result of the catalytic reaction.

Besides, active oxygen forms (singlet oxygen) trigger mechanism of activation in serotonin receptors, leading to better regulation of serotonin reuptake inhibition by selectively blocking serotonin absorption in presynaptic membrane. Re-balanced serotonin level helps in restoring homeostasis and ceasing thanatogenesis, promotes male health and central nervous system (CNS) function, and improves both cellular metabolism and immune response.

Regular use of the products boosts cellular exergy exchange in muscles, tissues, free cells (lymphocytes, macrophages etc.) and brain neurons, giving rise to a strong psychostimulatory effect by improving mental and physical activity, vital power and vigour. The product promotes mental process of thinking by improving both clarity of thoughts and ability to solve intellectually complicated tasks, lowering drowsiness and fatigue, accelerating time of reaction, enhancing impellent activity, and inducing conditioned response.

The product is generally beneficial to male CNS and improves brain activity, however not by inducing cerebral receptors and mediators similarly to most of currently known CNS stimulating drugs. Intracellular mechanism of action is directed to intensification of metabolic processes and stimulation of protective inhibition in the CNS, which both help in lowering irritability and nervous strain, and contributes to better mental activity. In this way, by inhibiting generation of noradrenalin (main stress hormone) and removing toxins and free radicals, cerebral cells are kept protected from damage. Better metabolism also improves adrenalin secretion in suprarenals that in turn leads to more optimal blood glucose value and supports heart function.

The product is intended for personal care purposes, has preventive action and may be used as complex therapy agent and photodynamic therapy agents in treatment of a wide range of neurological conditions for better mental and physical activities, psychosomatic health and quality of life.

Hypoallergenic product.

INDICATIONS:

- Dystonia
- Giddiness
- Sleep disturbance
- Neuralgia
- Neuropathy
- Multiple sclerosis
- Migraine (headache)

METHOD OF USE:

For rectal use only.

Take one single-dose container out of the package with clean hands, insert into the rectum and press out its content, while lying on your side. Apply one suppository 2 times a day for one month. Extend your course of treatment up to 90 days, if necessary.

SIDE EFFECTS:

No side effects found.

No product dependence and no rebound syndrome.

CONTRAINDICATIONS:

No contraindications detected.

STORAGE CONDITIONS:

Keep the product in a dark cool place at the temperature below 25°C.

SHELF LIFE:

Shelf life is 3 years from the date of production.

Do not use the product after expiration of the date of production, specified on the package.

SCHALI® Care Personal Hygiene Products are made under license No. 286-S.
